

# MONISHWARAN V

## AUTOMATION ENGINEER | EMBEDDED DEVELOPER

Madurai · +91 7539906214 · monishmurugan2224@gmail.com · <https://www.linkedin.com/in/monishwaran-velmurugan-9703451a6/>

### SUMMARY

Seasoned Hardware Technician dedicated to developing effective hardware solutions and proficient in PCB design, soldering, product development, circuitry, and reliability. Possesses a track record of ensuring optimal functionality. Seeking new challenges to contribute technical proficiency in a collaborative environment.

### PROFESSIONAL EXPERIENCE

|              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### EDUCATION

**Madurai Kamaraj University**  
**MCA**  
**2025**

**The Madurai College**  
**BSC IT**  
**2023**

**The Madurai College sec hr school**  
**HSC**  
**2020**

**St. Joseph matric sec hr school**  
**SSLC**  
**2018**

## CERTIFICATIONS

---

**Programming Essentials in python**  
**ICT Academy**  
**2022**

**AUTOMATION SERVICE ENGINEER**  
**IPCS GLOBAL**  
**2025**

## TECHNICAL SKILLS

---

Arduino, Python, C, Codeigniter, Bootstrap, Fabric.js, Proteus, Solidwork, Product Sketch Design, SUMO Traffic Simulation, Arduino IDE, Esp32, Esp8266, Jetson Nano, Jetson Orin, UNO, PCB design, Soldering, Product development, Circuitry, Hardware solutions, Embedded systems, Microcontroller-based projects, Sensor integration, Web development, Website design, Database Administration, SMD Assembler, PCB single layer Design, Communication, Teamwork, Problem-solving, Embedded Training, PLC programing, Prototype Development

## TECHNICAL PROFICIENCIES / TOOLS

---

Arduino, Proteus, PLC programming, Solidwork Basics Design, Product Sketch Design, Prototype Development, SMD Assembler, PCB single layer Design, Web development, HTML, CSS, Bootstrap, PHP, Codeigniter, MySQL, C, Python

## ACHIEVEMENTS

---

### INDIA BOOK OF RECORD

Done a 30 musical instruments named in pencil carbon tip.

## PROJECTS

---

### IOT-based smart city prototype design

Constructing an IOT-based smart city prototype design.

### Autonomous four-wheel vehicle prototype

Creating a prototype for a small, autonomous four-wheel vehicle that was driven by a Esp32 controller and a Jetson nano.

### GSM-based home automation system

Developing a GSM-based home automation system in the absence of WiFi.

**C++, GSM, ESP32,etc.,**

### Autonomous vehicle's fixtures

Constructing the autonomous vehicle's fixtures.

### Teaching IOT related interactive classes

Teaching IOT related interactive classes to the college students like smartcity Building, IOT projects, Home automation etc...

### Controller boards

I have worked on the controller boards like Esp32,Esp8266,Arduino nano, Arduino UNO, Jetson Nano and Jetson Orin.

### ECommerce Website

Build an ECommerce website for "Personalized Engraved Gifts" Website was designed for the handmade crafts and for "own use".

## LANGUAGE

---

TAMIL | ENGLISH

## HOBBIES

---

Pencli carving artist, Drawing, Crafts making, ect.,
